Reporting Standards and Frameworks →

APA has prepared its sustainability publications in accordance with the Global Reporting Initiative (GRI) Sustainability Reporting Standards, including the updated GRI 1: Foundation 2021, GRI 2: General Disclosures 2021 and GRI 3: Material Topics 2021, for the reporting period of January 1, 2025, to December 31, 2025. We also include indicators from Ipieca's Sustainability Reporting Guidance for the Oil and Gas Industry, the Sustainability Accounting Standards Board's (SASB) Oil and Gas Exploration and Production Sustainability Accounting Standard, recommendations of the Task Force on Climate-related Financial Disclosures (TCFD) and the U.N. Sustainable Development Goals (U.N. SDGs).

Global Reporting Initiative (GRI) Sustainability Reporting Standards

Disc. #	Disclosure Title	Location in Report/Response/Omission		
		Our Approach to Sustainability	Sustainability Progress Report	TCFD Analysis
GRI 2: General Disclosures 2021				
2-1	Organizational details	About APA Corporation, Page 3 Our operations, Page 4 2025 Form 10-K , Page 1 APA is headquartered in Houston, Texas.	APA is headquartered in Houston, Texas.	
2-2	Entities included in the organization's sustainability reporting	2025 Form 10-K , pages 1-7		
2-3	Reporting period, frequency and contact point		Reporting period: Data included in this report cover the 2025 calendar year unless otherwise noted. Frequency: Annual Contact: Kim O. Warnica, Executive Vice President, Chief Legal Officer, and Corporate Secretary APA Corporation 2000 W Sam Houston Pkwy S, Ste 200, Houston, TX 77042	
2-4	Restatements of information		Information about any restatements is provided in the footnotes to the relevant data.	
2-5	External assurance		Air, pages 4-5	
2-6	Activities, value chain and other business relationships	About APA Corporation, Page 3 Our operations, Page 4 Local economic impact, pages 42-43 2025 Form 10-K , pages 1-7, 35-36, F-18-F-20	Letter from the CEO, Page 2 Air, Page 5 Water, Page 6 Environmental stewardship, Page 8 Community, pages 13-14	
2-7	Employees		Our people, pages 9-10	
2-8	Workers who are not employees	Contractor safety management, pages 36-37	Health and safety, pages 11-12 Our people, Page 10 Embedded contractors — embedded contractors are members of contractor organizations that were selected by Apache and who are subject to Apache's competency requirements. These personnel are supervised by Apache employees, and most work primarily on Apache sites. The number of embedded contractors by operating area include: Egypt: 83 Suriname: 2 U.K.: 42 U.S.: 298	
2-9	Governance structure and composition	Governance, pages 47-56 2026 Proxy Statement , pages 2-7	Governance, pages 15-16	
2-10	Nomination and selection of the highest governance body	2026 Proxy Statement , pages 8-13 Governance Principles Corporate Responsibility, Governance, and Nominating Committee Charter

2-30	Collective bargaining agreements		We did not have any employees covered under collective bargaining agreements during the reporting period.	
GRI 3: Material Topics 2021				
3-1	Process to determine material topics	Identifying our most significant issues, Page 6 We determined the content for this report based on the issues we understand to be most important to our company and our stakeholders. We conducted an analysis of our most important issues following the materiality guidance in GRI Standard 101: Foundation, 2016. We also followed GRI's principles for stakeholder inclusiveness, understanding sustainability context and completeness.

Disc. #	Disclosure Title	Location in Report/Response/Omission		
		<u>Our Approach to Sustainability</u>	<u>Sustainability Progress Report</u>	<u>TCFD Analysis</u>
3-2	List of material topics	Material topics: Indirect Economic Impacts, Procurement Practices, Energy, Water and Effluents, Effluents and Waste, Biodiversity, Emissions, Occupational Health and Safety, Training and Education, Diversity and Equal Opportunity, and Local Communities. These topics are the result of the 2025 assessment taken to better understand internal and external stakeholders' perspectives on the most significant sustainability issues associated with our operations. Issues are grouped by topical categories that align with our approach to sustainability issues, not in order of importance or priority.		
TOPICAL STANDARDS				
GRI 3: Material Topics 2021				
201-1	Direct economic value generated and distributed	Our operations, Page 4 <u>2025 Form 10-K</u> , pages F-5, F-50-F-52	Community, Page 14	
201-2	Financial implications and other risks and opportunities due to climate change	Reporting approach, pages 5-6 Climate scenario analysis, Page 11 <u>2025 Form 10-K</u> , pages 18, 24, 26-27, F-35		
201-3	Defined benefit plan obligations and other retirement plans	<u>2025 Form 10-K</u> , pages 17, F-6, F-39, F-41, F-46		
GRI 203: Indirect Economic Impacts 2016				
3-3	Management of material topics	Our approach to social investment and community engagement, pages 40-42 Local economic impact, pages 42-43 Corporate governance, pages 48-49	Community, pages 13-14 Governance, Page 16	
203-1	Infrastructure investments and services supported	Our approach to social investment and community engagement, pages 40-42 Local economic impact, pages 42-43 Corporate governance, pages 48-49	Community, pages 13-14 Governance, Page 16	
203-2	Significant indirect economic impacts	Our approach to social investment and community engagement, pages 40-42 Local economic impact, pages 42-43 Corporate governance, pages 48-49	Community, pages 13-14 Governance, Page 16	
GRI 204: Procurement Practices 2016				
3-3	Management of material topics	Contractor safety management, pages 36-37 Local economic impact, pages 42-43 Human rights, pages 44-45 Corporate governance, pages 48-49 Engagement, pages 54-57	Air, pages 4-5 Water, pages 6-7 Environmental stewardship, Page 8 Our people, pages 9-10 Health and safety, pages 11-12 Community, pages 13-14 Governance, pages 15-16	
204-1	Proportion of spending on local suppliers		Community, Page 14

	Scope 1 and 2 greenhouse gas emissions		Air, pages 4-5	2025 GHG emissions data GHG Scope 1 = 6,124 Thousand tCO ₂ e GHG Scope 2 = 272 Thousand tCO ₂ e	
	Targets used to manage climate-related risks and opportunities and performance		Air, pages 4-5	Metrics and targets, Page 14	

U.N. Sustainable Development Goals (SDGs) Index

The table below provides locations in this report that describe how APA’s work is helping to drive progress toward all 17 U.N. Sustainable Development Goals.

U.N. Sustainable Development Goal		Location in Report/Response/Omission		
		 Our Approach to Sustainability	 Sustainability Progress Report	 TCFD Analysis
	Goal 1: End poverty in all its forms everywhere.	Community, pages 38-45	Community, pages 13-14	
	Goal 2: End hunger, achieve food security and improved nutrition and promote sustainable agriculture.	Community, pages 38-45	Community, pages 13-14	
	Goal 3: Ensure healthy lives and promote well-being for all at all ages.	Health and safety, pages 31-37 Community, pages 38-45	Health and safety, pages 11-12 Community, pages 13-14	
	Goal 4: Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all.	Our people, pages 25-30 Community, pages 38-45 Governance, pages 46-57	Our people, pages 9-10 Community, pages 13-14 Governance, pages 15-16	
	Goal 5: Achieve gender equality and empower all women and girls.	Our people, pages 25-30 Community, pages 38-45	Our people, pages 9-10 Community, pages 13-14	
	Goal 6: Ensure availability and sustainable management of water and sanitation for all.	Environment, pages 12-18 Community, pages 38-45	Air, pages 4-5 Water, pages 6-7 Community, pages 13-14	
	Goal 7: Ensure access to affordable, reliable, sustainable and modern energy for all.	Environment, pages 12-18 Community, pages 38-45 Governance, pages 46-57	Air, pages 4-5 Water, pages 6-7 Community, pages 13-14 Governance, pages 15-16	
	Goal 8: Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.	Our people, pages 25-30 Governance, pages 46-57	Our people, pages 9-10 Governance, pages 15-16	
	Goal 9: Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation.	Community, pages 38-45	Community, pages 13-14	
	Goal 10: Reduce inequality within and among countries.	Our people, pages 25-30 Community, pages 38-45	Our people, pages 9-10 Community, pages 13-14	

U.N. SDGs Index (Continued)

U.N. Sustainable Development Goal		Location in Report/Response/Omission		
		<u>Our Approach to Sustainability</u>	<u>Sustainability Progress Report</u>	<u>TCFD Analysis</u>
	Goal 11: Make cities and human settlements inclusive, safe, resilient and sustainable.	Health and safety, pages 31-37 Community, pages 38-45	Health and safety, pages 11-12 Community, pages 13-14	
	Goal 12: Ensure sustainable consumption and production patterns.	Environment, pages 12-18 Governance, pages 46-57	Air, pages 4-5 Water, pages 6-7 Governance, pages 15-16	
	Goal 13: Take urgent action to combat climate change and its impacts.	Environment, pages 12-18 Governance, pages 46-57	Air, pages 4-5 Water, pages 6-7 Governance, pages 15-16	Strategy, pages 5-12
	Goal 14: Conserve and sustainably use the oceans, seas and marine resources for sustainable development.	Environment, pages 12-18	Water, pages 6-7	
	Goal 15: Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, halt and reverse land degradation and halt biodiversity loss.	Environment, pages 12-18 Community, pages 38-45	Air, pages 4-5 Water, pages 6-7 Community, pages 13-14	
	Goal 16: Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels.	Our people, pages 25-30 Community, pages 38-45 Governance, pages 46-57	Our people, pages 9-10 Community, pages 13-14 Governance, pages 15-16	
	Goal 17: Strengthen the means of implementation and revitalize the global partnership for sustainable development. Glossary

Term	Definition (as used in this Report)
AIM for ZERO	APA's behavior-based safety program.
AIM for ZERO WASTE	A recycling program developed to align our day-to-day office and field behavior in the U.S. and U.K.
Announced Pledges Scenario (APS)	An IEA scenario that assumes that all climate commitments made by governments worldwide, including Nationally Determined Contributions and longer-term net zero targets, as well as targets for access to electricity and clean cooking, will be met in full and on time.
Annualize	To calculate or adjust to reflect a rate based on a full year.
Apache Ambassador Program	An employee training course that covers key energy issues and communications skills to help employees have conversations and answer questions about our industry.
Apache Louisiana Minerals LLC (ALM)	A wholly owned subsidiary of APA.
Apache Corporation Tree Grant Program	A charitable program that has provided trees to nonprofit charitable partners and government agencies in the U.S. since 2005, for beautification, preservation of natural habitats and reforestation.
Asset Retirement Obligation (ARO)	A legal or regulatory requirement for a company to dismantle and remove tangible equipment no longer in operation and to restore the land or seabed following the permanent cessation of oil and gas production.
Barrel of Oil Equivalent (BOE)	A unit of energy based on the approximate energy released by burning one barrel (42 U.S. gallons) of crude oil.
Borderlands Research Institute (BRI)	A research institute at Sul Ross University in Alpine, Texas, with the goal of providing land managers with current scientific information on the management of natural resources in the Chihuahuan Desert ecoregion.
Carbon Dioxide Equivalent (CO ₂ e)	A metric measure used to standardize the climate effect of various greenhouse gases, based on their global-warming potential.
Consumptive use of water	Use of fresh water and nonfresh water from surface or shallow groundwater, including treated municipal wastewater, since the industry's use of water from these sources typically removes these volumes from the normal surface or groundwater cycle.
Corporate Responsibility, Governance, and Nominating (CRG&N) Committee	APA board committee that oversees the nomination of directors, the annual board evaluation process, corporate governance and sustainability issues, as well as our sustainability publications. (See the CRG&N Committee charter for more details.)
CyberSmart	Employee online security awareness and education initiative.
Days Away, Restricted or Transferred (DART) Rate	The rate of injuries sustained by employees, contractors or both leading to missed workdays, restricted work activities or transfers to another job, per 200,000 hours worked.
Embedded contractors	Members of contractor organizations that were selected by Apache and who are subject to Apache's competency requirements. These personnel are supervised by Apache employees, and most work primarily on Apache sites.
Employee Resource Groups (ERGs)	Voluntary groups of employees that are open to all employees that come together based on shared identity, interests or life experiences. ERGs provide support, enhance career development and contribute to personal development in the work environment.

Term	Definition (as used in this Report)
Energy poverty	A lack of access to modern, affordable and reliable energy sources.
Enhanced Oil Recovery (EOR)	A process that involves injecting chemicals, gas or thermal fluids to improve oil recovery.
ESG	Environmental, social and governance.
Foreign Corrupt Practices Act (FCPA)	A 1977 U.S. federal law that prohibits U.S. citizens and entities from bribing foreign government officials to benefit their business interests.
Fresh water	Water with a total dissolved solids concentration of up to 1,000 milligrams per liter. ²¹ Uses of water from these sources can include drinking water, potable water and water used for agriculture. The definition can vary in accordance with local statutes and regulations and is defined within this document for reporting purposes.
GHG intensity	The ratio that expresses the amount of Scope 1 emissions as kg CO ₂ e per gross operated BOE.
Global Warming Potential (GWP)	The heat absorbed by any greenhouse gas in the atmosphere, as a multiple of the heat that would be absorbed by the same mass of carbon dioxide. Consistent with the <i>Intergovernmental Panel on Climate Change's Fourth Assessment Report</i> , we assign a 100-year GWP to each of these GHG component gases as part of our GHG inventory calculation. These values are 1 for CO ₂ , 25 for CH ₄ and 298 for N ₂ O. The mass of each component gas multiplied by its GWP results in a calculated value of carbon dioxide equivalents (CO ₂ e) for that component.
Greenhouse Gas (GHG)	Gases in the Earth's atmosphere that trap heat. Along with CO ₂ , GHGs include methane (CH ₄), nitrous oxide (N ₂ O), hydrofluorocarbons (HFCs), perfluorocarbons (PFCs) and sulfur hexafluoride (SF ₆).
Induced seismicity	Typically, minor earthquakes and tremors caused by human activities that impact the stresses and strains on the Earth's crust. Induced seismicity can be associated with industrial processes including geothermal energy extraction, mining, dam building, construction and hydraulic fracturing.
International Energy Agency (IEA)	An autonomous intergovernmental organization, established in 1974, that provides policy recommendations, analysis and data on the entire global energy sector.
Ipieca	A global not-for-profit oil and gas industry association for environmental and social issues.
Leak Detection and Repair (LDAR)	The process of identifying leaking equipment and repairing it to minimize emissions of methane and other volatile organic compounds.
Local spend (for U.S. suppliers)	Expenditures with suppliers whose operations are primarily within the state or operating area where the goods or services are provided. <i>Note: Some U.S. operating areas cover multiple states. For example, the Permian consists of Texas and New Mexico. If a supplier provides goods or services in multiple states within the same operating areas, they will still be considered local. If they cover multiple operating areas and states (e.g., Texas, New Mexico and Oklahoma), they are considered nonlocal.</i>
Local spend (for Egypt, North Sea and new ventures suppliers)	Expenditures with suppliers whose operations are primarily within the country or operating area where the goods or services are provided. <i>Note: Some international operational areas cover multiple countries. If a supplier provides goods or services in multiple countries within the same operating area, it will still be considered local.</i>

Glossary (Continued)

Term	Definition (as used in this Report)
Lost Time Incident Rate (LTIR)	The rate of injuries sustained by employees, contractors or both leading to loss of productive work in the form of absenteeism or delays, per 200,000 hours worked.
Management Development and Compensation (MD&C) Committee	APA board committee that oversees succession planning, executive compensation, and evaluation and scoring of overall corporate performance metrics. (See the MD&C Committee charter for more details.)
Methane intensity	The ratio that expresses the amount of methane emitted per gross operated BOE.
Natural gas value chain	Operations in the production, gathering and boosting, transmission and storage, gas processing and distribution segments.
Nonfresh water	Water that does not meet the definition of fresh water. Sources of nonfresh water include produced water and brackish groundwater.
Non-GHGs	Traditionally regulated air pollutants that include particulate matter (often referred to as particle pollution), ground-level ozone, carbon monoxide (CO), sulfur dioxide (SO ₂), nitrogen oxides (NO _x), lead, volatile organic compounds (VOCs) and nonmethane volatile organic compounds (NMVOCs).
Optical Gas Imaging (OGI) cameras	Scientific instruments used to locate leaks and emissions, including of methane, that are released into the atmosphere.
Pecos Watershed Conservation Initiative (PWCI)	A collaborative effort of corporate partners, biodiversity experts and regulatory agencies that aims to protect the Pecos River watershed in New Mexico and Texas.
Produced water	Nonfresh water found in hydrocarbon formations that is brought to the surface during the oil and gas production process.
Protected Species Observer (PSO)	Certified industry professionals who are trained in identifying species of concern and applying their knowledge to protect them during marine construction activities.
Recycled water	Produced water that has been treated for reuse in subsequent operations, including well completions or secondary recovery.
Reduced-emission completions	A process that captures gas produced during well completions and workovers so it can be processed for sale rather than flared.
Routine flaring	Flaring during normal oil production operations in the absence of sufficient facilities or amenable geology to reinject the produced gas, utilize it onsite, or dispatch it to a market.
Scope 1 emissions	GHG emissions that occur from direct releases of GHGs or combustion from sources that are owned or controlled by APA.
Scope 2 emissions	Indirect GHG emissions associated with the purchase of electricity, steam, heat or cooling.

Term	Definition (as used in this Report)
Scope 3 emissions	Emissions that result from activities involving assets that are not owned or controlled by APA, but that are indirectly part of our value chain.
Secondary recovery	A hydrocarbon production process that involves injecting water or gas into producing formations to improve oil and gas recovery.
Severe Incident Rate (SIR)	The rate of incidents resulting in fatal injury, permanent or significant loss or impairment of a body part or organ function, or that otherwise permanently change or disable individuals in their normal life activity, per 200,000 hours worked.
Stated Policies Scenario (STEPS)	An IEA scenario that reflects current policy settings based on a sector-by-sector and country-by-country assessment of the specific policies in place, as well as those that governments around the world have announced.
Sustainability pillars	Air, Water, Community + People
Switch Energy Alliance (SEA)	A nonprofit organization that provides collaborative global energy education and solutions for over 15 million students and environmental organizations.
Task Force on Climate-related Financial Disclosures (TCFD)	A reporting framework for climate-focused scenario planning analysis.
Texas Native Seeds Program	A nonprofit research and development program at the Caesar Kleberg Research Institute at Texas A&M University-Kingsville that works to develop native seed sources for vegetative restoration projects across Texas.
The Environmental Partnership (TEP)	A group of many oil and gas companies working together to address environmental challenges and improve environmental performance in our industry.
Total Recordable Incident Rate (TRIR)	The rate of recordable injuries sustained by employees, contractors or both that occur per 200,000 hours worked.
U.N. Sustainable Development Goals (U.N. SDGs)	A blueprint for achieving a better and more sustainable future for all by addressing the global challenges we face, including poverty, inequality, climate change, environmental degradation, peace and justice.
Vehicle Incident Rate (VIR)	The rate of vehicle-related incidents per 1 million miles driven.
Water consumption	Water volumes used in APA's operations that are sourced from water withdrawals.
Water-scarce regions	Regions where there is a lack of freshwater resources to meet the baseline water demand.
Water withdrawals	Water volumes drawn from surface water, groundwater, seawater, municipal sources and producing formations.
